interface is clean and simple like it's split into three tabs each executing a different action. The first tab and the main one is the "Downloader" from there you can choose what to download, what quality the video should have, the formats and the output field. Next is the "Converter" which lets you load up a source file and change the format or cut unnecessary parts of it. The last one is the "Tasks" which keeps track of any process you start and also opens the video with its own media player. Regarding the media player, it gets installed along with the downloader and acts like a backup for different formats are not supported by Windows Media Player. URL based download to start a process, first, you need to access it on YouTube or another website, copy the link and paste it in the "Video URL" field. Pick your preferred setting, and in a matter of seconds, the video is on your system, as a downside, after the application is installed every video you watch will have the pink icon acting like a watermark. This feature can annoy some users but at the same time it marks the eligible videos, so it's a two-way road. In conclusion, Windows TubeMate is a handy application that can download any video from the most popular sites
